CALIBRATION & GAS MEASUREMENT

Calibration: Meter calibration is critical to profitability. We offer calibration services for all equipment we install and stock all replacement parts. BLS supports assets from conception and every step along the way to ensure your equipment is operating at its highest efficiency.

Gas Chromatography: Our calibrations and measurement teams are equipped with the industries best tools & equipment. Our portable gas chromatograph allows our team to calibrate your entire site on the first trip, minimizing facility costs & time.

INTEGRITY TESTING/ CLEANING SERVICE

Black Label Services provides Integrity Testing on production facilities to verify that equipment meets customer standards. BLS can perform integrity pre-start up, on a maintenance schedule or upon request. Our qualified technicians will test the integrity and reliability at high pressure, monitor leaks and make sure you meet state and federal requirements.

After testing we will provide customers with a detailed report. We also offer all inclusive cleaning services to keep your facility clean and environmentally sound.

CHEMICAL INJECTION

- The ability to run multiple chemicals and multiple pumps off of one controller
 - High Accuracy +/- .01%
 - Complete BLS Fabricated Systems
 - Capability of making a simple 1 point Injection System that can be increased to 48 Injection points with one control panel
 - Modbus/SCADA capable
 - Single point for repair and maintenance
- Temperature Control for methanol injection
- Flow Control based on PPM of chemical to production volume
 - Accurate dosage rates
